

PHOTOGRAPHY ARE MEMORIES

SAVE EVERY BEAUTIFUL MOMENTS IN YOUR LIFE.

## What We Are...

There are many reasons for people to travel long distances. For some it will be a picnic, a change from busy life, for some it will be an adventurous journey, for some it will be a desire to learn new cultures, lifestyles and cuisines, for others it will be a longing to know nature, for some it will be pilgrimage and spirituality.

A starter pack for smartphone photography beginners

Wedding Photography

We capture your beautiful moments in your wedding

## GALLERY

PHOTOGRAPHY ARE MEMORIES

SAVE EVERY BEAUTIFUL MOMENTS IN YOUR LIFE

## ABOUT US

The world today is living with photography that has grown and gained recognition more than any other art. The light of the darkness of battles and riots, and of the beautiful moments that we wish to keep in our hearts. There are many reasons for people to travel long distances. For some it will be a picnic, a change from busy life, for some it will be an adventurous journey, for some it will be a desire to learn new cultures, lifestyles and cuisines, for others it will be a longing to know nature, for some it will be pilgrimage and spirituality.

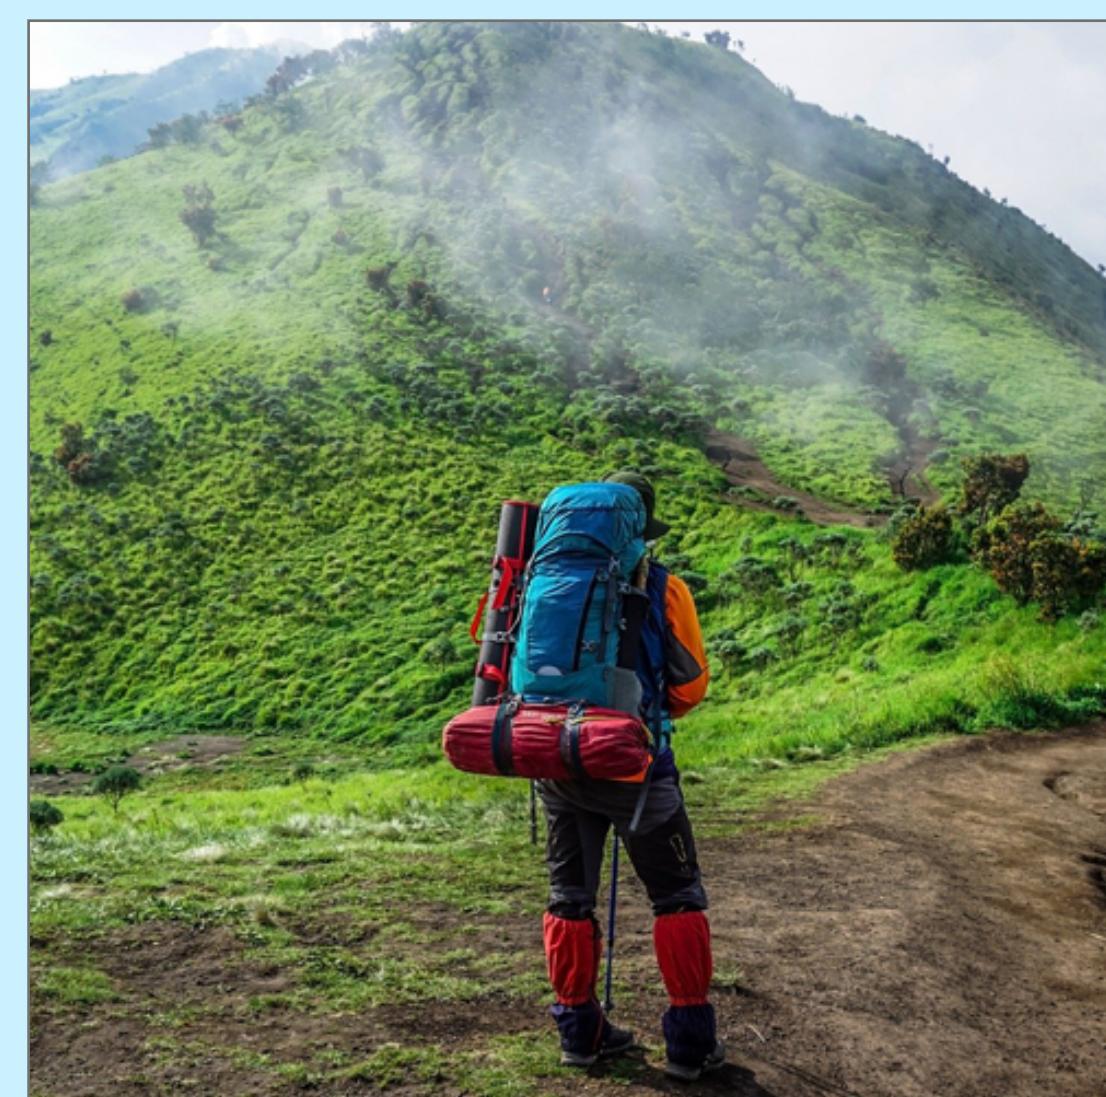

## TRAVEL AND PHOTOGRAPHY

One word or one paragraph is not enough to define photography. The books that wrote it do not fully define it. First I will say an art form of it. Light painting with precision. This is the only way to freeze a memory over time. The magic of time frames that travel in subtle form.

Frames.....

When we freeze an image time, we are frames of time and space, be it beautiful landscape scenes or a steaming cup of tea sitting on a table. Everything comes alive in our heads. Those sparks of imagination can be mixed with the burning memories of the past, which create a stimulus of emotions in our brain. A beautiful carnival will bring our minds and our hearts inside.

Professional Crew

Today, more than just a professional photographer, everyone is a photographer. With the advent of digital cameras and mobile cameras, everyone is a photographer. Here's the point of a good photographer. The good quality of a good photographer is that he can see the views from many angles. View from an angle that no one can see. For that we must first observe well. Every moment we have a lot of frames in front of us when we see it and put it in the camera. Becoming a good photographer.

Tools....

Not having a good camera does not eliminate good pictures. When we have a good moment, the camera in our hand is the best camera. Today, there are many people who take beautiful pictures, even on mobile cameras. Not only this, with the advent of social media today our pictures will be able to reach the world quickly. A good photographer should always be ready for every moment that comes before us at any moment.
